### Graduate Student in Data Science at Johns Hopkins University

I hold a B.S. in Chemical Engineering from the University of Virginia and am currently pursuing graduate studies in Data Science at Johns Hopkins University. I have over 10 years of experience in intellectual property law, particularly patent examination and prosecution in the field of biotechnology. I am particularly interested in how data science concepts can be leveraged to understand trends in innovation.

When I am not writing code, I can be found watching Formula 1 racing, training in the ballet studio, and browsing the sci-fi section of my local bookstore.

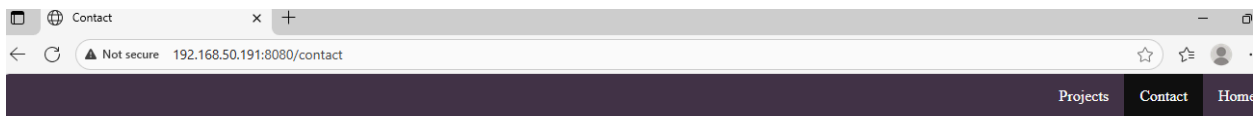

## Projects

### Module 1: Personal Website

This project covers construction of my personal website, which was developed in Python using Flask. A Flask blueprint was used to control the pages of the website. I created a base HTML template which was invoked for each page, and used CSS to style the output.
